Dear Mr. President,

I wrote to you 28 November 2018 about a critical issue with Ukraine's Ministry of Social Policy and Prime Minister Reva's TASK GROUP developing corruption to the greatest level since 1994.

This situation has devolved even more. Now Reva's TASK GROUP has weaponized Ukraine's National Police and sent it on a "witch hunt" to further intimidate and silence us as we expose the corruption in Kyiv.

I need your help. For 25 years we have shipped humanitarian aid to Ukraine's medical, social, educational and military infrastructures on a citizen-to-citizen platform. Now we are facing onerous threats!

Corruption in Ukraine's government has caused us to halt actions. We have pleaded with President Poroshenko, Prime Minister Grosman and Minister of Social Policy Andrey Reva but all efforts are ignored with an appalling elitist arrogance.

Because we questioned the corruption and exposed criminal actions in Ukraine, we are now targeted by Ukraine's National Police for "investigation of possible criminal actions." This is a bogus charge intended to intimidate and silence us. I am enclosing a letter announcing this "investigation." You will notice no charges are specified; no name is mentioned. All is intimidating vindictiveness!

Corruption has metastasized! The TASK GROUP's actions are designed to extort through fines and fees.

I am asking you to contact Ukraine by telephone and letter inquiring why this Task Group has become such an obstacle and has insulted American generosity and goodwill. Please ask why the National Police have been directed to pursue a policy of vindictive intimidation and suppression.

Contact from you will prove you are aware of this evil. Please inquire why American generosity and goodwill are being insulted by Reva's Task Group and now threatened with intimidating inspections. Just this simple action will do amazing things for the situation.

I have ample documentation that I can email when requested. Please help!

Respectfully,

John L. Kachelman, Jr.
