

Ivano-Frankivsk Construction Update

22 August 2019

Dear brethren,

We are so happy that we have finally seen the roofing over to begin! Today, wooden trusses are being unloaded that will be used for the assembly hall. These trusses were made to order in Kyiv because they have to meet all new requirements for large roofing areas. It is a special day for us and for the Church in Ivano-Frankivsk.

Big thanks to all of you for prayers and financial support that makes this possible.

Next week we plan to distribute humanitarian aid together with Bibles that have the address and phone numbers for the Church. Besides doing that work the men are planning to have private sessions on salvation and forgiveness with those we know and have good relationships.

Dear brothers and sisters! We look forward to seeing you here in October and pray to God for the Lord to send our way those people that will accept Christ and will be baptized. For the Lord to be glorified all over the world.

In Christian love, Ivan

Please help complete this construction phase! Send a generous donation to:

The unloading of roof trusses. These trusses will be put in for the roof as soon as the walls are finished. We anticipate to start it at the beginning of September. In order to be prepared I have written you of our plans—in the coming week every member will come and help with construction to help workers finish walls as soon as possible. All of us have jobs and have to provide for families but we are pressed by circumstances to stick with our plans.

We want to do as much as we can to be acceptable partners to you in Lord's efforts.

Glory to the Lord for having made this work possible for us!

And big thanks to all brethren for your donations and prayers.

We are studying the plan of the structure to be assembled

Will you join with us and send a donation so we can secure the funds that are lacking for completion of this phase?
